FOR
ENERGY**

EUROfusion

Agenda

↳ Technology Transfer Award

- General information
- Formal requirements, evaluation process and criteria
- Proposal Documents
- Questions

General Information

Objective of the Fusion Technology Transfer Award:

With this award, Fusion For Energy (F4E) and EUROfusion want to promote the use of fusion technologies and know-how in non-fusion markets by showcasing success stories. This 10.000€ award recognizes achieved or ongoing projects which integrate fusion solutions in other fields*.

* Non-fusion in this context means applications outside the Fusion for Energy and EUROfusion activities.

- ✗ The non-fusion application foreseen shall not promote activities, or be related to the military, alcohol, tobacco, religion, politics, intolerance, violence, firearms, pornography, obscenity, gambling or illegal drugs.

Evaluation Criteria:

- Socio-Economical Impact (50%)
- Effort made to achieve the commercial use of a fusion technology in a non-fusion market (50%)

Formal requirements, evaluation process and criteria

Formal requirements:

- ✓ The Applicant shall be submitted in the English.
- ✓ The Applicant must be an entity registered in the European Union.
- ✗ The non-fusion application foreseen shall not promote activities, or be related to the military, alcohol, tobacco, religion, politics, intolerance, violence, firearms, pornography, obscenity, gambling or illegal drugs.

Evaluation Criteria:

- Socio-Economical Impact (50%)
- Effort made to achieve the commercial use of a fusion technology in a non-fusion market (50%)

Evaluation criteria	Note	Comment
Socio-economic impact	50%	Potential socio-economic impact of the use of the technology in the non-fusion application for the applicant and for society. Potential benefits for society (e.g. job creation), potential advantages, such as faster production, cost reduction, better product, higher safety or comfort of the operations, energy savings, technical improvements in the non-fusion market.
Effort made to achieve the commercial use of a fusion technology in a non-fusion market	50%	Effort made by the applicant in terms of investment, allocation of resources, actions and activities carried out to achieve the technology transfer in non-fusion markets. Examples of activities that show an effort done to achieve technology transfer: market analysis study, freedom to operate study, commercialization/business plan, partnership agreements/contracts under negotiation or signed, technical feasibility studies, increase of the TRL of the technology by technical developments, qualification, certification, etc. to reach the non-fusion market.

Formal requirements, evaluation process and criteria

Formal requirements:

- ✓ The Applicant shall be submitted in the English.
- ✓ The Applicant must be an entity registered in the European Union.
- ✗ The non-fusion application foreseen shall not promote activities, or be related to the military, alcohol, tobacco, religion, politics, intolerance, violence, firearms, pornography, obscenity, gambling or illegal drugs.

Evaluation Criteria:

- Socio-Economical Impact (50%)
- Effort made to achieve the commercial use of a fusion technology in a non-fusion market (50%)

An Evaluation Board (F4E, European Commission, EUROfusion, and Viromii) will award the project.

Length and language of proposals

Proposal must be submitted in English, and shall not be longer than 3 pages:

- Name of the Applicant and contact details of the contact person of the Applicant.
- Short summary of the technology transfer case study carried out or ongoing.
- Description of the use made or planned to be made of a fusion technology in a non-fusion market.
- Evaluation of the market potential.
- Origin and description of the fusion technology used or to be used in a nonfusion application.
- Description of the effort (investment/resources/actions/activities) made and/or planned to be made to achieve the use of a fusion technology in a non-fusion market.
- Socio-economic impact or potential socio-economic impact of the technology transfer project.
